

TOTTIE(TM) PLUSH MASCOT

Manufacturer Tech Pack - T.P. TOTS(TM) - Version 2.0 - LOCKED TOTTIE / U.S. COMPLIANCE UPDATE

STATUS: DESIGN INTENT / SAMPLE DEVELOPMENT

This document is the controlling written specification for the first prototype. Manufacturer must not begin bulk production until a physical pre-production sample is approved in writing.

LOCKED VISUAL DIRECTION

Body: Soft cream / warm white; original cylindrical Tottie proportions.

Face: Two navy embroidered oval eyes with white highlights; cheerful OPEN embroidered mouth with deep-navy interior and visible pink embroidered tongue.

Cheeks: TWO sunshine-yellow embroidered five-point stars.

Core: Warm-brown recessed plush/fabric opening; no exposed rigid cardboard.

Tissue flap: One separate warm-white fabric TP sheet permanently sewn into the upper rear/right back-top seam; hangs naturally down one side; visible dashed/perforation-style stitching; not removable.

Right-foot embroidery: 'Tottie(TM)' on the FRONT of the right foot in the approved cute slanted script, official multicolor brand palette, small navy TM, with pink embroidered heart beneath. Use supplied artwork; do not redraw.

Concept reference only. The written specifications in this tech pack override any visual inconsistency in the concept image.

1. Locked Character Identity

Feature	Required specification
Character	Tottie(TM) - official T.P. TOTS(TM) toilet-roll mascot
Overall form	Soft cylindrical toilet-paper roll with open top core and one floppy toilet-paper sheet/flap
Body color	Soft cream / warm white
Arms	TWO cream plush arms - one on character left and one on character right; both required and symmetrical in placement
Legs / feet	TWO cream plush legs/feet; both required
Face	Two navy embroidered oval eyes with small white embroidered highlights; cheerful OPEN embroidered mouth with deep-navy inner mouth and visible pink tongue
Cheeks	TWO sunshine-yellow embroidered five-point stars; one centered beneath/outside each eye
Core	Warm-brown recessed circular core at top; plush/fabric construction, not actual cardboard
Tissue flap	One warm-white floppy TP-sheet flap permanently sewn into the upper rear/right back-top seam, with decorative stitched/dashed perforation-style detail
Right foot	Tottie(TM) embroidered on FRONT of right foot in approved cute slanted script and official multicolor brand colors, small navy TM, with pink embroidered heart beneath

2. Prototype Dimensions

Target finished plush height is **8.0 in (20.3 cm)**. The remaining measurements below are prototype targets, not immutable production dimensions. Manufacturer should preserve Tottie's visual proportions and propose adjustments needed for stable construction.

Measurement	Target	Prototype tolerance / note
Overall height	8.0 in / 20.3 cm	+/- 0.25 in
Body width	Approx. 7.0 in / 17.8 cm	Confirm after pattern development
Body depth	Approx. 5.5 in / 14.0 cm	Confirm after pattern development
Core opening	Approx. 2.5 in / 6.4 cm diameter	Must visibly read as a TP-roll core
Tissue flap length	Approx. 6.0 in / 15.2 cm	Soft, floppy; no wire; sewn permanently into back/top seam
Arm count	2	MANDATORY
Leg/foot count	2	MANDATORY

3. Materials & Construction

Component	Specification
Outer body / arms / legs / tissue flap	Premium short-pile plush or velboa in soft cream/warm white. Supplier to submit swatches before sample.
Stuffing	New 100% polyester fiberfill or equivalent toy-grade fill; soft/cuddly but body must retain cylindrical shape. Supplier must disclose
Eyes / mouth / star cheeks / foot logo	Machine embroidery only. No buttons, beads, glued eyes, sequins, or detachable decorative pieces.
Core	Recessed plush/fabric opening in warm brown. No exposed rigid cardboard in finished toy.
Seams	Strong, concealed where practical; reinforce arm, leg and tissue-flap attachment points. Construction must withstand applicable
Tissue flap	Soft unstructured plush/fabric; permanently sewn into upper rear/right back-top seam; decorative perforation-style stitched line; n
Labels	Provide a permanently attached sewn-in product/tracking label location that remains visible/legible and can carry required produ

4. Color Direction

Digital brand colors are reference targets for sample development. Final fabric and embroidery thread must be selected from physical supplier swatches and approved by T.P. TOTS(TM) before production.

Area	Digital reference	Direction
Body / limbs / tissue flap	#FFF8F0	Soft cream / warm white
Eyes / mouth outline	#0B1D3A	Deep navy
Tongue / foot heart	#FF7FA1	Coral pink
Star cheeks	#FFC845	Sunshine yellow
Core	#A67C52	Warm brown
Foot name	Approved T.P. TOTS(TM) palette	Turquoise, coral pink, sunshine yellow, lavender, lime green; navy TM

5. Face & Embroidery Placement

The face must remain centered on the front panel. Both eyes must match in size and height. The open smile sits centered between/below the eyes. One yellow star cheek appears on each side of the face. Stars should be clearly separated from the eyes and arms.
Manufacturer should digitize embroidery from approved vector artwork when supplied; do not redraw the face.

Right-foot embroidery: The approved 'Tottie(TM)' script is embroidered on the FRONT of the character's right foot. Preserve the approved slanted handwritten/script appearance, letter proportions, multicolor sequence, small navy TM and pink heart beneath. Do not replace with block lettering, vertical lettering, or a substitute font.

Critical character rule: Tottie always has two arms, two legs/feet and two yellow star cheeks. A hidden or omitted limb in a perspective illustration does not authorize its removal from the plush pattern.

6. U.S. Safety & Compliance Requirements

- **Children's toy standard:** Develop the product for U.S. sale as a children's plush toy subject to applicable requirements of 16 CFR Part 1250, which incorporates ASTM F963-23. The domestic manufacturer/importer is responsible for identifying the specific applicable ASTM F963 sections.
- **Third-party testing:** For a toy intended primarily for children 12 and under, applicable children's-product safety rules must be tested by a CPSC-accepted third-party laboratory where required. Do not represent the product as 'ASTM certified' before applicable testing is completed.
- **Stuffing materials:** Supplier must provide materials suitable for applicable ASTM F963 requirements, including Section 4.3.7 (Stuffing Materials), and provide composition/source documentation requested by the laboratory or importer.
- **Mechanical / physical hazards:** Construction, seams, embroidery, attachments and the tissue flap must be designed to satisfy all applicable ASTM F963 mechanical and physical requirements for the final age grade, including applicable use-and-abuse, small-part, sharp-point/edge and attachment evaluations.
- **Lead:** Children's-product materials must comply with applicable total-lead requirements under 15 U.S.C. 1278a. Any paint or similar surface coating, if introduced, must comply with 16 CFR Part 1303.
- **Phthalates:** Any accessible plasticized component/material subject to the rule must comply with 16 CFR Part 1307. Current design intent is embroidered/plush construction with no intentionally added plastic decorative parts.
- **Small parts:** Final age grading must be established before labeling. If intended for children under 3, applicable 16 CFR Part 1501 small-parts requirements must be addressed. No intentionally detachable decorative parts are permitted.
- **Tracking label:** The finished children's product and its packaging, to the extent practicable, must carry visible, legible, permanent distinguishing marks from which the manufacturer/importer or private labeler, production location/date, batch or run, and specific source can be ascertained.
- **Children's Product Certificate (CPC):** For imported product, the U.S. importer is responsible for issuing the CPC based on passing test results. The CPC must identify each applicable CPSC rule and the specific applicable ASTM F963 sections, and include the required manufacturer/importer, custodian, manufacturing and testing/laboratory information.
- **Flammability:** Do not make a blanket 'flammability certified' claim. Toys are not generally subject to a separate mandatory toy flammability third-party test under 16 CFR Part 1250, but the finished toy must not be a banned hazardous flammable solid under the Federal Hazardous Substances Act; laboratory/importer to assess whether testing is appropriate.
- **Age grade / warnings:** Manufacturer must propose an age grade based on the final design and intended use, but no final age marking, choking warning, '0+', or other compliance claim may be printed until the importer and test laboratory confirm the correct labeling.

Manufacturer compliance deliverables requested with pre-production sample

Item	Required from supplier / factory
Bill of materials (BOM)	Material names, composition, supplier/source and color for plush, fill, embroidery thread, labels and packaging.
Test plan / quote	Proposed CPSC-accepted laboratory and itemized applicable U.S. test scope for final age grade.
Material declarations	Available lead/phthalate/material declarations and prior test reports, clearly identified as supporting documents only - not a substitute for
Tracking-label data	Factory legal name/address, city/country of manufacture, production month/year and batch/run coding method.
Production sample	Final pre-production sample made with production-intent materials and construction for testing/approval.

7. Sample Approval Process

Stage	Requirement
1. Material review	Supplier sends cream plush, brown core fabric, fill, label material and embroidery thread options for approval.
2. First prototype	One complete 8-inch Tottie sample made to this tech pack, including exact right-foot embroidery and sewn tissue flap.
3. Photo review	Send clear front, left side, right side, back, top and 3/4 photos plus ruler/measurement photos and close-ups of foot embroidery, mouth, st
4. Physical sample	Ship physical prototype for fit, softness, color, embroidery and construction review.
5. Revision sample	Correct all written comments if required.
6. Compliance sample	Produce production-intent sample/material set for agreed CPSC-accepted laboratory testing.
7. Pre-production approval	NO BULK PRODUCTION until written approval is issued and required compliance path is confirmed.

8. Manufacturer Quote Request

Please quote: prototype/sample cost; sample lead time; MOQ; unit pricing at available quantity breaks; mold/pattern/setup fees; embroidery digitizing/setup fees; fabric and fill options; sewn-in label options; packaging options; production lead time; U.S. testing/certification support; proposed CPSC-accepted laboratory; estimated testing cost; carton quantity/size/weight; and shipping terms. Please identify any construction change you recommend before making the sample.

9. Tracking Label / Sewn-In Label Data - PLACEHOLDER

Field	Production entry
Manufacturer / importer / private labeler	T.P. TOTS(TM) / importer details to be finalized before production
Manufacturing location	Factory city, country: _____
Manufacturing date	Month / year or approved production code: _____
Batch / run	_____
Specific source / factory ID	_____

Final tracking-label format and placement must be reviewed before bulk production. Information may be coded if the required information remains ascertainable by the responsible U.S. manufacturer/importer/private labeler.

10. CPC / Laboratory Record - TO COMPLETE AFTER TESTING

Record	Entry
Final product / model	Tottie(TM) Plush Mascot - model/SKU: _____
Final age grade	_____
Applicable CPSC rules / ASTM F963 sections	To be identified from final design and CPSC-accepted laboratory test scope
CPSC-accepted laboratory	Name / address / CPSC Lab ID: _____
Test report number / date	_____
CPC custodian / contact	_____

APPROVAL

T.P. TOTS(TM) approval:

Date:

Manufacturer:

Sample version:

REGULATORY NOTE: This tech pack is a design/manufacturing specification, not a test report or legal certification. Final applicable requirements depend on the finished product, materials, age grading, packaging and claims. U.S. regulatory references were checked against current CPSC guidance for children's toys, ASTM F963-23 / 16 CFR Part 1250, CPCs, tracking labels, lead, phthalates and small parts.

CONFIDENTIAL DESIGN REFERENCE - Tottie(TM) / T.P. TOTS(TM) - Do not alter, reproduce, distribute, or begin bulk production without written authorization.
